

GT Diesel Part# 40420

Ford | Dodge | Chevrolet /GMC

Product Information Sheet v7.0

Bully Dog Technologies develops products with customers in mind, and almost every customer has unique needs and desires.

Every Bully Dog product is developed to be flexible, allowing users to customize their vehicles to whatever end they desire. Want outrageous performance down the race track? You got it. Looking for more power up a steep grade? Bully Dog can help. Whatever users' needs may be, Bully Dog provides them with the high quality solutions they need and the "back in your seat" experience they crave.

Bully Dog exceeded themselves with the introduction of the Triple Dog GT. This innovative product is actually four products combined into one sleek, new design. It's a downloader that adds up to 120 HP, a tuner that allows for multiple drive train settings to be tuned and adjusted, a fully customizable gauge pack that monitors four gauge functions at one time and a conscientious Driving Coach. The revolutionary Driving Coach software monitors wasted vehicle energy and then informs the driver how to change their driving habits to increase fuel economy.

The GT is loaded with additional features and the GT Diesel works on Ford, Dodge and GM trucks and SUVs.

Features:

- Huge Horsepower and Torque Gains (Over 100 HP)
- Improved Engine Efficiency (Fuel Economy Potential)
- Four On-The-Fly Power Levels
- Safety Defueling
- Loads of Download Features like Speedometer Calibration
- Display Over 15 Vehicle Parameters (Pids)
- Read and Erase Diagnostic Trouble Codes (Dtcs)
- Vehicle Performance Testing
- Free Performance Testing Software for PC Online
- Exclusive Driving Coach Feature
- Full Color Display with Multiple Color Themes
- User Set Day and Night Driving Modes
- Easy Installation
- Internet Updates and Upgrades
- Initiate DPF Burnoff on '09 Gm And 07.5 -'09 Dodge Diesel

POWER: 100+ HP/ 200+ LBS. FT.

UPC CODE: 681018404204

PACKAGING WEIGHT: 2 LBS

Product Information Sheet v7.0

WHAT YOU LOVE: The Horsepower

Bully Dog provides unrivaled engine tuning. What excites us most is being able to provide the best tunes available; to provide power and torque that truly improve the driving experience. Doing tuning right means achieving noticeable gains that put drivers further back in their seats throughout the power band. It also means constant innovation; turning over new rocks and picking through old tunes to find a better way. It means making sure every vehicle we support has the best tune we can provide.

The chart below documents the difference between a stock 2010 Ford 6.7L Powerstroke and the same truck tuned with the GT Diesel. It's just a sample of the clean, consistent power that comes with the GT.

WHAT YOU NEED: The Economy

It seems like a fairytale that you can get better economy AND more horsepower. And it is, to an extent. The old saying that you can't have your cake and eat it too is still true. But this much is also true: with the GT Diesel, you have the choice!

The product of the meticulous tuning Bully Dog works so hard to achieve is a more efficient burn within the cylinder. And what that means is entirely up to you. Put your foot down, and Bully Dog tunes can give you the instant power you're craving. But keep it up, and the same tune can deliver some serious economy as well. So while we can't tell you exactly what your mileage gains may be, you can be sure that with a light foot you can see better economy than you ever did driving stock.

If improved economy is all you're looking for, the GT still offers unmatched features. Not only do Bully Dog tunes make it easy to achieve better economy, the GT also features exclusive Driving Coach software. The Driving Coach analyzes your vehicle's fuel economy and your personal driving habits in real time, and gives relevant feedback to help you improve those habits. So better economy when you need it, and more power when you want it: what's not to love?

Driving Coach

The Driving Coach is an interactive software program that is included with every GT Diesel. The program provides real time audio and visual feedback to maximize driving efficiency. The screen shot below displays the Driving Coach. For the Driving Coach to be truly effective it must be properly set up.

Performance Testing

The GT gas performance testing will accurately calculate and record a vehicle's performance data for a variety of tests. The performance testing gives the user the ability to trigger a performance test when the vehicle begins rolling or by using a simulated "christmas tree" that is displayed on screen.

Display and Record performance results

- 60 ft. time
- 0-60 mph time
- 1/8 mile time
- 1/8 mile speed
- 1/4 mile time
- 1/4 mile speed

Free Performance Analysis Software

Free performance analysis software for the PC will retrieve performance tests from the GT and allow the user to analyze their performance runs right on their desktop. Analyze speed curves, RPM, horsepower and torque; even get an easily sharable time slip. Now available at http://www.bullydog.com/performance_testing.php.
